## Contenance Formulary

This formulary is to be used as a guide when selecting or prescribing products for patients that have either a bladder or bowel problem. Please use the formulary for all new patient assessments and those patients who need a reassessment. If an alternative product which is not on the formulary is required please call the continence service for advice. All products listed are latex free including packaging, unless otherwise stated.

### INDWELLING CATHETER LONG TERM PLEASE ENSURE FEMALE LENGTH CATHETERS ARE NOT USED FOR MALE PATIENTS

Larger charriere sizes i.e. size 18, although available on prescription, should not be used unless specifically indicated.

Licensed for urethral and suprapubic, use up to 12 weeks. All patients should be assessed on an individual basis and their optimum time for catheter change established. **All balloon sizes are 10 mls unless otherwise stated.**

Please note: the last two digits of the order code will denote the charriere size required

ORDER CODE	PRODUCT	GAUGE/CH SIZE	QUANTITY	DRUG TAFFIF PRICE £
DH310/12-16	<b>Rüsch</b> Sympacath Aquaflate Hydrogel Coated <b>Latex</b> Catheter. <b>Standard</b> length 40cms. Includes syringe prefilled with sterile water and empty 10 ml syringe for catheter removal	12 - 16	PK x 1	£6 - 18

	Hydrogel Coated <b>Latex</b> Catheter. <b>Female</b> length 23 cms. Includes syringe prefilled with sterile water and a 10 ml syringe for catheter removal.			
DA3101/12-16	<b>Rusch</b> Brilliant Aquafate all silicone. Includes syringe prefilled with sterile water and 10ml empty syringe for balloon deflation. Standard length	12 - 16	PK x 1	£6 - 07
DA2101/12-16	As above female length.	12 - 16	PK x 1	£6 - 07
AA8A/12-18	<b>Coloplast</b> Folsyl X-Tra Clear Silicone Catheter <b>standard</b> length. Including pre-filled syringe with 10% glycerine solution. (Glycerine inhibits balloon deflation as it has a similar osmotic pressure to urine).	12 - 16	PK x 1	£6 - 31
AA8B/12-16	As above, <b>female</b> length	12 - 16	PK x 1	£6 - 31

**CATHETERS FOR SHORT/MEDIUM TERM USE**

Maximum period of use is up to 28 days.  
Licenced for urethral and supra pubic use

ORDER CODE	PRODUCT	GAUGE/CH SIZE	QUANTITY	DRUG TAFFIF PRICE £
DP310112- DP310116	<b>Rüsch</b> Aquaflate PTFE Coated <b>Latex</b> Catheter. <b>Standard</b> length.	12 - 16	PK x 1	£2 - 16
DP210112- DP210116	<b>Rüsch</b> Aquaflate PTFE Coated <b>Latex</b> Catheter. <b>Female</b> length.  Supplied with sterile water and 10 ml syringe.	12 - 16	PK x 1	£2 - 16

## SPECIALIST CATHETERS

### OPEN ENDED LONG TERM CATHETERS

This catheter may offer an alternative for those patients experiencing problems with urinary infection, by-passing or catheter blockage and are licensed for up to twelve weeks. There is no tip to the end of these catheters creating an additional drainage channel.

3423 - 212 3423 - 214 3423 - 216	<b>MacGregor Healthcare Ltd</b>  Qufora all silicone catheter with integral balloon and open tip. Prefilled water/glycerine syringe for balloon inflation and additional syringe for deflation.	CH12 CH14 CH16	Pk x1	£5.50
AA8C/12-18	<b>Coloplast</b> Folsil Open-Ended Standard length catheter	12 - 16	PK x 1	£6.38

### SILVER ALLOY COATED CATHETERS

**For use only after discussion with a member of the Continence Team.** The Bard Bardex IC Silver alloy coated catheters may be suitable as an option for those patients with a history of recurrent catheter blockage/infection. Though not suitable for urine that contains proteus or pseudomonas. The release of silver ions within the coating restricts the microorganism's ability to multiply. They are licensed for medium term use of 28 days as their effectiveness is reduced after this time.

### LEG BAGS

The sterile bags listed below are suitable for the collection of urine from indwelling catheters or incontinence sheaths. (Bags that are not sterile should only be used with sheaths). These bags are intended for daytime use. A larger drainage bags which can be attached to the leg bag have more capacity for overnight use. Bags may be worn in different positions on the leg, thigh, knee or calf and the position will determine the length of the inlet tube. Bags can be attached to the leg using latex free, washable elastic velcro straps with non-slip backing which come with the leg bags or leg bag holder/support.

### SINGLE USE NIGHT DRAINAGE BAGS

Single use for connection to leg bags or catheter valves to maintain a closed circuit and reduce catheter acquired infections. Note T-tap for easy emptying.

ORDER CODE	PRODUCT		QUANTITY	DRUG TAFFIF PRICE £
371-5844	<b>Teleflex Single use Night Bag Non sterile</b> 2litre T tap, latex free, includes 1 hanger per pack		Pk 30	£9.41 (31p Each)
D1MT	<b>BARD URPLAN</b> single use 2 litre T Tap Non sterile		Pk 30	£10.03 (33p Each)

### SEVEN DAY DRAINABLE BAGS

These bags are for continuous use for catheters on free-drainage and should be replaced after seven days. Disconnection in the interim is not recommended as this breaks the sterile closed system and increases the risk of catheter acquired infection

ORDER CODE	PRODUCT	TAP	QUANTITY	DRUG TAFFIF PRICE £
00-1201	<b>Flexicare</b> F4L 2000ml with Lever tap	Lever	Box 10	9.97 (99p Each)
14853204	Macgregor healthcare ltd Qufora Q42 litre drainable bag. Needle free sample port . Tube clamp T valve tap	120cm inlet tube non return valve 1 pair of non latex gloves.	Box 10	£9.57 (95p each)

**BELLY BAG**

Each bag comprises a drainage bag and is worn around the waist. Urine is drained into the bag by means of residual bladder pressure. The bag should be changed every 28 days.

ORDER CODE	PRODUCT		QUANTITY	DRUG TAFFIF PRICE £
B1000	<b>Teleflex Rüsche</b> Belly Bag. Latex free 1000 mls capacity bag with anti-reflux valve. Suitable for attachment to both urethral or suprapubic catheters. <b>Can be worn for up to 28 days.</b>		Pk x 10 (supplied in single units)	£10.62 each
PO337	Replacement belt  <b>Please note:</b> If adaptor is required to enable night drainage bag attachment, please contact clinisupplies they will send a complimentary one.		Pk x 1	£2.38
B1000CT	As above with 60 cm drainage tubing.		Pk x 10	£10.62
B1000P	As above with sample port		Pk x 10	£10.62

## CATHETER BAG STANDS

Drainable bags need to be supported on a stand to avoid the creation of negative pressure at 30cms below the bladder. If pressure is allowed to build it can cause catheter blockage from suction on the bladder mucosa.

**Stands are supplied by Medequip or by requesting a sample from the company representative.**

## LEG BAG HOLDERS/SUPPORT

An alternative method of supporting the leg bag. Manufactured from a soft, latex free fabric it encases the leg bag to hold it against the patient's leg. The sleeve has an opening for the tap for easy emptying.

ORDER CODE	PRODUCT	SIZE	QUANTITY	DRUG TAFFIF PRICE £
	<b>Optimum Medical</b> Ugo fix sleeve leg bag holder			
3005	Small	24-39cm	Pk x 4	£7.28 £1.28 each
3006	Medium	36-55cm		
3007	Large	40-7-cms		
3008	Extra Large	65-90cm		
	<b>Clini Supplies</b> Prosys Leg Bag Sleeve	24-40cms	Pk x 4	£7.50
PLS3881	Small			£1.87
PLS3904	Medium	36-50cms		
	Large			

PLS3928	<b>Bard</b>	40-65cms		£8.14 £2.04 Each
150111	Urisleeve Colour code - yellow	Small 24-39CM	Pk x 4

150131	Urisleeve Colour code Brown	Large 40-70CM		
150141	Urisleeve Colour code Green	Extra Large 65 - 95 CM		

### CATHETER SUPPORT STRAPS

ORDER CODE	PRODUCT	SIZE	QUANTITY	DRUG TAFFIF PRICE £
3002	<b>Optimum Medical</b> Ugo Fix Catheter Straps	<b>Short 45 cms</b>	Pk 5	£12.50
3003		Medium 80cm		£13.80
3009		Long 130cm		£16.80
3010		Ex long180cm		£18.80

383001	<b>Simpla</b> G-Strap. Latex free re-useable strap, which firmly secures catheters and tubing. It acts as a shock absorber, minimising risk of urethral trauma.	Adult 50 CM	Pk 5	£14.29 Each
383003	As above	Abdominal 90 CM	Pk 5	15.77 £3.15 Each

### CATHETER VALVES

It is recommended to change catheter valves every 5-7 days. A urine drainage bag may be attached to an open catheter valve to allow for free drainage overnight.

Contra indications: reduced bladder capacity, no bladder sensation, cognitive impairment, and insufficient manual dexterity to operate a catheter valve.

ORDER CODE	PRODUCT		QUANTITY	DRUG TAFFIF PRICE £
21104204	<b>Qufora</b> Catheter Valve		Pkt x5	£8.50
3000	<b>Optimum Medical</b> Ugo Catheter valve		Pkt x5	£10.80

--	--	--	--	--

### CATHETER MAINTENANCE SOLUTIONS

Catheter maintenance solutions should not be considered as an option for routine catheter maintenance. There should be a clinical rationale for use of catheter maintenance solutions, and they should only be considered for short term use, to treat indwelling catheters for prevention of encrustation, or to dissolve crystal formation. A 3.23% citric acid solution is recommended for reduction of crystallisation. Two sequential instillations of a small volume are more effective than a single administration

Monitoring pH will help identify the need for, and the type of solution required. Citric acid should only be used for those patients who have a consistently high pH of 6.8 and above.

It is good practice to cut open catheters on removal, from those patients where blocking is a problem to see if the lumen is blocked by sediment deposit.

ORDER CODE	PRODUCT	VOLUME	QUANTITY	DRUG TAFFIF PRICE £
9746609	<b>B Braun</b> Uro-Tainer Twin. Solution divided into a twin delivery system allowing for two sequential solution administrations.  Citric acid 3.23% Suby G CE	2 x 30 ml	1	£2.40
9746625	Citric acid 6% Solution R CE	2 x 30 ml	1	£2.40

CSG 50	<b>Bard</b> Optiflo G 3.23% citric acid (Suby G) solution.	50 mls	1	£3.56

CSS100	<b>Bard</b> Optiflo S 0.9% Saline solution	100 mls	1	£3.36

### CATHETERISATION LUBRICANT, LOCAL ANAESTHETIC AND ANTISEPTIC

For use when catheterising both male and female patients. To minimise damage to the urethra, facilitate painless instrumentation and reduce the risk of associated infection.

**Please note:** Must not be used in patients with known hypersensitivity to the active ingredients or in patients with significantly damaged or bleeding urethral mucosa.

ORDER CODE	PRODUCT	VOLUME	QUANTITY	DRUG TAFFIF PRICE £

## SHEATHS

These can offer a valuable alternative method of urinary incontinence management for men. Sheaths are available with and without fixing devices which may be applied externally. It is important to accurately assess for type and size of sheath using manufacturers measuring device. It is recommended that sheaths are changed on a daily basis.

Adhesive removers and barrier products are not normally recommended with sheaths. Adhesive residue can be washed away with warm soapy water and barrier creams may interfere with adhesion. If a patient is experiencing related problems, advice may be obtained from the continence specialist team.
